Chancery Hand Calligraphy
Calligraphy, from the Greek “Calli” and “Graphic” literally means “beautiful writing”. Chancery Hand is the first recognized calligraphic style of writing. You will learn everything from how to hold the pen in order to achieve the unique look of the Chancery Hand letters, to how to care for the pen so that it will serve you well for as long as you pursue the art of Calligraphy!
Thur, 6–8pm, 3/7–4/11

Community Art Classes (continued)

Knitting for Everyone
Knit hats, scarves, totes, blankets and so much more. Whether you’re new to knitting, it’s been a while or you want to learn new techniques, Knitting for Everyone is a class for all skill levels. From casting on to weaving in ends, you’ll learn how to make several beautiful projects. The instructor has dozens of projects for you to choose from that will help you learn how to knit or go beyond the basics. This is a fun class where you set your own pace. Patterns, step-by-step instructions, and videos are available to support you in your quest to master this skill, even when you’re not in class. Give yourself the gift of knitting, a hobby for all ages. Sign up with a friend, a family member or a neighbor and you’ll have the beginnings of a knitting club. A supply kit ($60) is available for purchase from the instructor on the first day of class. This supply kit is for students that haven’t taken a class with Sonia’s Knits before and includes one set of needles, some tools and four balls of yarn to complete the first four projects for beginners.

Thur, 6–9pm, 1/18–3/7 $219+$60 materials ACC Littleton Campus Sonia Berlinger
Thur, 6–9pm, 3/28–5/16 $219+$60 materials ACC Littleton Campus Sonia Berlinger

“Sonia B. is a wonderful teacher! She presented the material in a way that I was able to learn the stitches and then work on a project that required practicing that exact material, resulting not only in a feeling of confidence but finishing an actual item.”
– Knitting For Everyone

Floral Design Certificate Program
Earn a certificate in Floral Design Principles after you successfully complete this series of four consecutive classes. Classes focus on fresh flower arranging and are taught by Crystal Oleskevich, who owns her own floral business. Your instructor will submit documentation for certification once you’ve completed all four of the required courses. Certificates are issued by Arapahoe Community College. Courses Include: Introduction to Floral Design Principles Demonstration: Explore how to put flowers together using proven design principles. Get tips on purchasing fresh flowers and caring for flowers from your garden. Discuss the right tools and their care to create beautiful designs in this demonstration class. Concepts and Containers: Learn to create arrangements. Discuss styles including traditional, contemporary, oriental, funky, seasonal and special events. Explore color, focal point, pop, texture, volume and size. Make an arrangement to take home, container provided. Creating Style, Shape and Color: Learn to utilize shape and color to create a stylish arrangement for any occasion. Bring your own favorite vase or container and make an arrangement to take home. Arrangement Workshop and Critique: The culminating workshop brings your flower arranging skills together. Make an arrangement to take home.

Tue 6–9pm, 2/27–3/19 $219+$160 materials ACC Littleton Campus Crystal Oleskevich

Yearbook Boot Camp: Easy Photo-Memory Books without the Overwhelm
If you suffer from Photo Overwhelm, you are missing out on the many benefits of interacting with your photos. Studies have shown that connecting with your photos and memories increases happiness, relaxation, connection, self-esteem, gratitude, perspective, and a sense of purpose, while also decreasing stress. At Yearbook Boot Camp, we tackle overwhelm head-on by focusing on one year’s worth of photos while using a simple, organized system for preserving photos and memories in photo-memory books that are professionally printed. Come to class prepared with one year’s worth of photos saved to your computer or tablet. Each hour of class starts with 10-20 minutes of instruction and tips, followed by open work time as you complete your yearbook. The methods you will learn can be easily duplicated to other photos.

Voice Overs… Now is Your Time!
In what could be the most enlightening webinar you’ve ever taken, our instructor and professional voice coach will show you how you can actually begin using your speaking voice for commercials, films, videos, and more. Most people go about it the wrong way. In this introductory class, you will learn about a unique, outside the box way to break into this creative, fulfilling, and potentially lucrative industry. Voice-overs can be managed on your own terms, on your own turf, in your own time, and with minimal overhead! Whether you choose to pursue voice-overs part-time or full-time, this could be the game changer you’ve been looking for. In addition to online instruction, you will be given the opportunity to book a 1-on-1 script read and voice evaluation via telephone with your instructor for the following day. This class will be presented via Zoom and you will receive a link 24 hours prior to class.

**Basic Photo Organizing with Permanent Storage**

Did you know that we take more photos every day than were taken in the entire 19th century? It’s no wonder we need some help organizing and managing them so that we can actually find, see, and enjoy them. Join Jennifer Wise, memory-keeping consultant since 2005, for a basic photo organization class. You’ll learn six steps to successful photo organization, following advice from photo experts, plus a method for permanently storing your photos. NOTE: This is a basic class (no metadata discussions) geared toward an average photo-taker. We will be talking about organizing digital photo files, not printed photo organization. This is an online class that will be held over Zoom. You will receive a join link prior to the class, and a document with notes from your instructor after the class.

Thur, 7–8pm, 3/28
ACC Virtual Course – Held Via Zoom Jennifer Wise

**Photography Club**

Have a camera you don’t know how to use? Or maybe you don’t even have a camera? Learn how to use whatever you have to take fantastic photographs from international music photographer Curt Dennis, from basics like exposure to advanced techniques like light painting, you’ll learn how to take photos that make people go, “whoa”.

**RISE: Rising together In Search of Excellence**

A Program for Individuals with Acquired Brain Injury

Arapahoe Community College, in collaboration with Craig Hospital and MINDSOURCE - Brain Injury Network at the Colorado Department of Human Services, is offering a new program designed to bridge the transition between hospital-based rehabilitation and return to the community for adults living with Acquired Brain Injury (ABI), a brain injury that has occurred after birth. The ABI community includes those that are living with traumatic brain injuries (TBI). The courses in the program address the cognitive and psycho social skills needed to achieve post-injury social, educational and/or vocational goals.

ACADEMIC NONCREDIT ART CLASSES

All academic noncredit classes run concurrent with the for-credit academic classes. Register ASAP to ensure enrollment. For more information, contact Katie Caron, katie.caron@arapahoe.edu.

3D Design (Academic Noncredit)
This course introduces the fundamentals of three-dimensional design, form, and space and applies the elements and principles of design to three-dimensional problems. Working in our Makerspace, students will explore a broad spectrum of contemporary media, including digital practices and contexts, and develop a knowledge base of historical and contemporary 3D practices and artists. In this course, students will work in 3D media for design, and with cardboard, tape, paper, wood, casting, molding and plaster techniques.
Tue/Thur, 9–11:45am, 1/16–5/7
$529

Angela Belt

Jewelry and Metalwork I (Academic Noncredit)
Learn how to work with metal! This course teaches the fundamentals of jewelry and metalsmithing. Projects begin with surface embellishment pieces that incorporate various surface finishes on metal, riveting, and forming. Additional projects include soldering a variety of joints, fabricating a box form, and creating a pendant with a bezel set stone. ACC has one of the best equipped jewelry metals studios in Colorado. Each student will have their own jeweler’s bench and flex shaft during class.

Amy Bailey

Drawing I (Academic Noncredit)
If you’ve ever wanted to be able to draw, now’s your chance! This course investigates the various approaches and media that students need to develop drawing skills and visual perception. You’ll practice observational drawing with pencil, charcoal, and ink, and make accurate and creative drawings you can be proud of.
Mon/Wed, 6–8:45pm, 1/17–5/6
$529
ACC Littleton Campus
Lisa Adams

Ceramics I (Academic Noncredit)
This course introduces traditional and contemporary approaches to ceramic form and processes with an emphasis on hand building techniques, and a basic introduction to the potter’s wheel. Course includes basic surface design, glaze, and kiln firing procedures. Emphasis is placed on individual style and how clay can be used as a vehicle for expression. Students create work from both low- and high-fire clay bodies using a combination of coil, slab, extruded, wheel thrown and texturing techniques, surface slips, and glazes. An introduction to ideas about sculpture, the vessel, and the kiln firing process are presented. At the conclusion of this course, students will be well versed in hand building techniques, use of the wheel, and firing kilns. Students will also learn to develop strategies to translate an idea into sculptural and functional forms. Students purchase clay/tools; glazes/equipment are provided.

Empowered Communication: Overcoming Public Speaking Anxiety for Effective Communication
Have you ever found yourself in situations where you had something to say, but felt that nagging hesitation in the pit of your stomach and stayed quiet? That feeling is fear and you are one of many who suffer from fear of public speaking. There’s GOOD news! You can learn to be an effective communicator! In this extraordinary class, we’re about to unravel the psychology behind the hesitation and what holds you back. We’ll dive deep into the inner workings of our minds and learn how to transform your negative self-talk into a powerful force for good. Get ready to supercharge your confidence, skyrocket your self-esteem, and most importantly, grant yourself the long-awaited permission to let your voice soar! Join me, and together, we’ll break free from the chains of self-doubt, silence those inner critics, and unleash the unstoppable force within you. It’s time to take charge, make your voice heard, and boldly step into a brighter future where you’re the one in control. Are you ready to rise above your fears and finally unleash your voice? Let’s do this!

**Computer Basics**
If you have little or no experience with personal computers and want to learn the basics, this class is perfect for you. Explore the main components of a typical computer system and the basic elements of the Windows interface. Navigate in Windows Explorer, organize files and folders, search for items on a computer, and personalize Windows. Learn to use an Internet browser and explore routine maintenance.

**Microsoft Excel 2019 and 365 Level 1**
Microsoft Excel Level 1 teaches some of the most essential introductory skills for using the Excel app. Introductory topics include identifying parts of the Office user interface; entering, editing, and formatting entries; selecting cells and ranges; creating and modifying basic formulas; applying relative and absolute cell referencing in formulas; inserting charts and tables; creating a template; and sorting and filtering data. Learners will be in a computer lab where they will be able to develop and apply skills.

**Microsoft Excel 2019 and 365 Level 2**
Microsoft Excel Level 2 covers key Excel skills. Among others, intermediate topics include themes, cell styles, and number formats, using functions for dates and numbers, conditional functions, text functions, and lookup functions. Learners will be in a computer lab where they will be able to develop and apply skills.
**Digital Marketing Bootcamp**
The Digital Marketing program is designed to help students with an interest in marketing create a portfolio and begin working in the digital marketing field. The project-based curriculum blends marketing theory, critical thinking skills, and practical experience to prepare students for an entry-level position in a growth industry. Become proficient in advertising platforms such as Facebook, Google, Instagram, Twitter (X), and LinkedIn. Our program provides a fast-paced, detailed curriculum with a full-breadth of digital marketing knowledge in order to be a competitive applicant. Digital marketing jobs are growing 112 percent faster than the U.S. national average job growth. Upon completion, you’ll be equipped to be succeed at jobs such as marketing coordinator, social media advertising coordinator, branding coordinator, junior UX designer, and more.

**Front-End Software Developer Bootcamp**
Front-End Software Developers build the pieces of applications and websites that users see and interact with. This involves creating components that look good and provide functionality when a user interacts with them. It also involves interacting with Back-End applications and displaying data in an aesthetically pleasing manner. If you enjoy creating something visually appealing or seeing great results come from what you create the Front-End program will be a great fit for you.

- **Tue, 7-8:30pm, 2/27-6/5**  $3,999

Heart saver First Aid, CPR, and AED
This OSHA approved course is designed for anyone with limited or no medical training who needs a course completion card in first aid, CPR and AED use to meet job, regulatory or other requirements. It is also perfect for anyone wanting to be prepared in the event of an injury or emergency. Heart saver® First Aid, CPR, and AED is a classroom, video-based, instructor-led course that teaches students critical skills needed to respond to and manage a first aid, choking, or sudden cardiac arrest emergency in the first few minutes until emergency medical services (EMS) arrives. Students learn skills such as how to treat bleeding, sprains, broken bones, shock, and other first aid emergencies. This course also teaches adult, child, and infant CPR and AED use. Students will receive a Heart saver® First Aid, CPR, and AED course completion card, valid for two years. The cost of the course includes the completion card ($20 fee).

Spanish

**Beginning Spanish 100**
This course is designed to promote beginner writing and oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to greet and introduce themselves to others, tell time, describe weather conditions, recognize cognates, talk about personality/physical traits, discuss what people do using the regular present tense of -ar, -er, and -ir verbs, express how people are feeling, and express possession.

Thur, 6-8pm, 1/25-2/29 $149+optional book
ACC Littleton Campus John Soister
Tue/Thur, 5:30–7:30pm, 2/6–2/22 $149+book
ACC Littleton Campus Jimena Pearson

**Beginning Spanish 101**
This course is designed to promote intermediate writing and oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to convey likes and dislikes, narrate an action in progress (present progressive), describe plans and convey what will happen in the future (Ir+a+infinitive), express opinions by talking about what they want or what they prefer (stem changing verbs), point out demonstrative adjectives, discuss to whom or for whom an action takes place, and avoid repetition in speaking and writing (OD and ID pronouns), talk about events in the past (preterite), talk about knowing people or knowing how to do things (saber and conocer), and talk about daily routines (reflexive verbs).

Tue/Thur, 5:30–7:30pm, 3/5–3/21 $149+book
ACC Littleton Campus Jimena Pearson

**Beginning Spanish 102**
This course is designed to promote very intermediate writing and oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to describe past events in detail, discuss situations, celebrations, describe conditions, express ongoing actions in the past (imperfect progressive), explain how something is done (adverbs), and rank people and things (ordinal numbers).

Wed, 6–8pm, 1/17–2/21 $149+optional book
ACC Littleton Campus John Soister

ACC Littleton Campus Jimena Pearson

**Intermediate Spanish 200**
This course is designed to promote advanced writing and oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to state impersonal information, give directions, explain how to get to places, give suggestions in informal settings (commands), state an action that has some relation to the present (present perfect), and talk about the future.

Wed, 6–8pm, 3/6–4/10 $149+optional book
ACC Littleton Campus John Soister
Spanish (continued)

Intermediate Spanish 201
This course is designed to promote effective and advanced reading, writing and oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to comment on what is necessary, possible, probable, and improbable. Students will be able to express expectations and hopes, describe emotions, opinions, wishes, doubt, uncertainty and conjecture, (subjunctive). Students will also hypothesize a situation that is not part of the speaker’s present reality (conditional) and use the past perfect to refer to a past event, give formal orders, ask people to do something (formal commands), use possessive pronouns, and finally students will learn how to express unexpected occurrences or accidental events.

Wed, 6–8pm, 4/12–5/17  $149+optional book
ACC Littleton Campus  John Soister

“John Soister is a very skilled and knowledgeable instructor. I appreciate that he prioritized and explained what is most important to learn from the class. He is patient and encouraging.”
— Intermediate Spanish

Spanish for the Professional
(Academic Noncredit)
This course introduces students to a working knowledge of the Spanish language, cultural behaviors, and values useful in various professional fields such as healthcare, law enforcement, bilingual education, business, and others. Upon completing this course, you will be able to:

- Reproduce the pronunciation and intonation of the Spanish language;
- Understand basic oral statements, instructions, and questions;
- Apply learned vocabulary, phrases, and grammatical structures in simple conversations;
- Accurately use basic vocabulary and grammatical structures in simple writings such as forms and notes;
- Read and comprehend basic information;
- Demonstrate an awareness of appropriate cultural behaviors and values in common situations pertinent to the professional field.

ACC Littleton Campus  Veronica Chavez

Spanish Heritage Language (Beginner-Basico)
This course, conducted entirely in Spanish, is designed for Heritage speakers of Spanish and others from a Spanish-speaking background. Main goals of this class are developing basic skills in reading and writing in Spanish, basic grammar structures, conversation on familiar topics, vocabulary, and developing a greater familiarity with U.S. Hispanic culture.

Wed, 5–7pm, 3/6–4/10  $209+book
ACC Littleton Campus  Jimena Pearson

Spanish Heritage Language (Intermediate-Intermedio)
This course is designed for heritage speakers of Spanish. It provides instruction that builds upon the existing reading, writing, speaking and listening skills, and the cultural heritage and knowledge of students. Structure of the language, oral and written communication, fundamentals of grammar, and composition are included. The course introduces a more advanced vocabulary beyond the familiar routine and develops an appreciation for Hispanic cultures as manifested in Spanish speaking countries and in the United States. This course is conducted entirely in Spanish.

French

French I
Parlez-vous français? Let’s begin speaking French as of this semester! Learn how to ask for directions, order food, make a reservation, ask about the weather, and buy everyday items at boulangeries and markets. Use your French to navigate your everyday life in a French speaking country. Each meeting will have a cultural focus so that we cover the basics of the language and culture. Students will be asked to come up with their own desired goals and topics as well. Our meetings will be relaxed and fun and each student will be able to communicate at a basic level at the end of this course. Allons-y!! Let’s start!! This course is designed to promote very beginning oral communication. Vocabulary in context, grammar, and cultural units will be covered. Upon completion of this course, students will be able to greet and introduce themselves to others, to tell time and at what time an event takes place, to describe weather conditions, to recognize French words based on their similarity to English words, to talk about personality/physical traits. Students will also be able to discuss what people do using the regular present tense of -er, -ir, and -re verbs, to express how people are feeling, their physical and emotional states, and their location, to use comparisons to specify which of two people, places, or things has a lesser, equal, or greater degree of a particular quality, and finally how to express possession.

STUDY ABROAD

Community Travel Abroad

Highlights of Morocco: Marrakech, the Sahara, and Fes — July 11–22, 2024
www.grouptoursite.com/tours/trishmorocco
One day you’re riding a camel through the Sahara Desert and the next you’re walking through lively city souks. On this small group adventure tour, you’ll see classically tiled gates and walled medinas as well as towering mountain ranges and colorful botanical gardens, all located in the heart of North Africa. Among these unique landscapes and inspiring cultures, find your Morocco moment. To learn more about this trip, contact trish.sangelo@arapahoe.edu

A Week in Sicily: Palermo, Syracuse, and Taormina — July 12–20, 2025
www.grouptoursite.com/tours/trishsicily
Sicily’s traditions and cuisine take on a new life as the summer comes to an end and locals take to the streets. From fresh fall harvests and beautiful blue-sky winters to warm spring weather, each season brings a unique reason to visit. Travel to lively Palermo, seaside Syracuse, and charming Taormina to uncover the island’s beautiful landscapes and interesting history. Contact trish.sangelo@arapahoe.edu to learn more about this trip.

Academic Study Abroad

Environment and Culture in Costa Rica
May 30–June 7, 2025
www.efstudyabroad.com/professors-trip/2576944JS
Imagine waking up to the calls of howler monkeys and mist rolling in before you trek into the cloud forest. You’re not in Littleton, Colorado, anymore! At its heart, the Central American country boasts an epic landscape that is home to nearly five percent of the world’s biodiversity. Discover how fragile these endangered ecosystems are as you travel through different rainforest preserves and unearth dazzling displays of color and sound. The Biology, Geology, Photography, and Spanish programs will collaborate on this unique Study Abroad experience. Students will foster intercultural competency, communication, and learn, compare, and contrast approaches and methodologies while furthering their education, career exploration, and personal growth. Contact trish.sangelo@arapahoe.edu to learn more about this trip.

ESL at WCP
Beginning ASL Part I
Beginning ASL Part I is designed to include all the cultural information students should know if they never take another ASL class again, including basic ASL skills, presented in a fun, interesting manner intended to draw them to additional ASL classes. Additional classes will build greater vocabulary while having cultural understanding already in place.
Thur, 6:30–8pm, 1/25–3/14
$149
ACC Littleton Campus
Jennifer Wise

Beginning ASL Part II
Beginning ASL Part II is designed as a follow-up to Beginning ASL Part I or for those that have some knowledge of deaf culture and ASL, to build greater vocabulary while having cultural understanding already in place. Additional time to use previously-learned signs will be provided through activities and developing signed conversations. This course is designed for vocabulary-building and practice with ASL. The main concepts and lessons in this class include subject-pronoun copy, transfer error, the grammatical use of rhetorical questions, making signs plural, signing age, how to sign the concepts of OR and AND, additional uses of rhetorical questions, visual-spatial aspects of ASL, and an introduction to classifiers. Vocabulary in this course focuses on beginning conversational signs: activities; interests and favorites; colors; numbers 20-30; months and holidays; seasons and weather; background and information; classroom directions; size; states, countries, cities and distance; people, family, and pets.
Thur, 6–6:30pm, 1/25–3/14
$99
Hybrid Flipped Course: Jennifer Wise
ACC Littleton Campus and Zoom

Intermediate ASL Part I:
Intermediate ASL Part I is designed as a follow-up to the Beginning ASL Part I and Part II classes to build greater ASL fluency through grammatical features and vocabulary while having cultural understanding already in place.
Thur, 1/25–3/14
$99
Hybrid Flipped Course: Jennifer Wise
ACC Littleton Campus and Zoom

Intermediate ASL Part II
Intermediate ASL Part II is designed as a follow-up to Intermediate ASL Part I (and Beginning ASL Parts I and II) to build both greater expressive language skills (signing) and greater receptive language skills (understanding what is signed to you), while having cultural understanding already in place. The class will touch on a few additional Deaf Culture points as well as a tool for improving fingerspelling fluency.
LEARNING OBJECTIVES: The main concepts and lessons in this class include using Deixis/Referents for places; additional signs using the Agent Suffix; Deaf Culture notes on using titles in names, Straight Talk, and using an interpreter; Deaf Education; eight types of Classifiers; phonograms for fingerspelling mastery; telling time, including Numerical Incorporation
VOCABULARY: School locations, people in a school, activities with the Agent Suffix, education, fields of study, signs for skills/knowledge/abilities, time, beginnings and endings
Thur, 7:15–7:45pm, 4/4–5/9
$99

ACC Littleton Campus

Women and Finance – Investing
Get started on your financial journey with looking at your current financial situation and making sure you can meet your short- and long-term goals. When it comes to creating a plan for your finances, it’s important that you have key foundational elements in place. You will learn how investing works, different types of investments, and what is right for YOU. This class will help you get clear and lay out the next steps.

1. Organizing your finances
2. Budgeting and debt management
3. Short- and long-term goals: Will you have enough money during retirement?
4. Diversifying your investments and financial planning
5. Retirement income planning

Wed, 5:30–7:30pm, 3/13
ACC Littleton Campus

Women and Finance – Financial Planning
Now that you have your finances in order, you can focus on different strategies to build a stronger financial plan and gain the ability to deal with unexpected events that can negatively affect your retirement assets. This class will be full of information presented by expert guests that will allow you to position yourself to realize your personal financial goals.

1. Tax planning
2. Planning for unexpected expenses
3. Balancing family and work
4. Divorce and money
5. Widowhood
6. College planning: Individuals and small business

Wed, 5:30–7:30pm, 4/10

**Retirement Planning**

Retirement Planning Today
Retirement Planning Today explains time-tested strategies that help you to make informed financial decisions. Plan for your future with confidence. Build a nest egg, protect your assets, and create a retirement plan that matches your goals and values. Determine the savings you need to retire today or in the future.

**Estate Planning**
A good estate plan has many different parts to it. Learn how to protect your family by creating a comprehensive estate plan. We’ll cover which documents you need based on your individual situation. We’ll also discuss the benefits, drawbacks and how to avoid probate.

**Real Estate**

Managing Your Rental Properties
This class is taught by Jim Flint, CRS, a veteran with over 35 years of experience in Denver investment real estate or Dan Hagstrom, also a veteran real estate manager and investor. Learn how to screen your prospective tenants and keep the bad ones out. Be aware of “dos and don’ts” when dealing with tenants. If you must evict, how? Have a pool of qualified service people that respond quickly. We’ll explain how to keep your property rented when others have vacancies. We also review the Fair Housing Laws in addition to a detailed discussion of a lease. Is professional property management for you? An individual meeting with the instructor is included for no additional fee. If you have questions, please call Jim Flint at 303.759.2222. There is a $20 material fee due to instructor at time of class.

Alternatives to Traditional Real Estate Investing
Look at real estate investing from an angle other than single family homes, duplexes or condos. There are a world of options out there; commercial property, assisted living homes, partnerships, and more! Learn how to create a business plan for your investment, including financing options, management, and the formulas you need to measure your ROI. While this class is aimed at people who have already discovered the advantages of investing in real estate, it can also be suitable for those who are simply ready to diversify into investments other than the stock market. A personalized meeting is included. The instructor, Jim Flint, CRS, has over 35-years’ experience with real estate in five states. If you have questions, please call Jim Flint at 303.759.2222.

Equine scholarships are available to qualified individuals.

Horse Training and Horsemanship Lab
Gain hands-on practice in the skills and methods for ground handling foals, yearlings, and older horses; green broke training; retraining and finishing horses. Students must complete an average of 10 hours of lab work and four hours of independent study weekly. Dates, times, and locations arranged with instructor. Arranged, 1/15–4/24
$399
ACC Off Campus Course  Damian Ficca

Reproduction
The class discusses the anatomy and physiology of equine reproduction. Students will learn about:
- Gestation/birth
- Management of stallion, mare and foal
- Disease associated with reproduction and breeding
Mon/Wed, 6–7:30pm, 1/15–2/28  $239
ACC Littleton Campus  Damian Ficca

Get Your Real Estate License Today!
Online education has never been more convenient.
Enroll in your Pre-Licensing courses today!

Pasture Management
Learn about the care of pastureland—fertilizing, irrigation, hay varieties, crops, haying, soil testing, grazing practices and how to maximize pasture usage.
Mon/Wed, 7:30–9pm, 1/15–2/28  $239
ACC Littleton Campus  Damian Ficca

Groundwork
This is a practical and hands-on course covering safe ground handling, leading, round pen work, stalking, lunging, long-lining and ground driving. Field trips and labs to be determined outside of lecture sessions.
Mon/Wed, 6–7:30pm, 3/11–4/24  $239
ACC Littleton Campus  Damian Ficca

Genetics
In this course you’ll learn about the principles of Mendelian inheritance, random heredity, the selection of traits, and the creation of alleles.
Mon/Wed, 7:30–9pm, 3/11–4/24  $239
ACC Littleton Campus  Damian Ficca

“I love Damian’s passion for horses and everything around horses. He is a gem and we are so lucky to have him.”
- Horse Training and Horsemanship Lab
Beekeeping for Newbees
Thinking of becoming a beekeeper or just interested in learning more about the honey bee? This is an introductory class to learn the basics about bees and how to care for them. We will cover bee basics, hive management, creating a bee-friendly space, and all things honey! Come learn about the tiny but mighty honey bee, how bees affect our world, and how we can participate with them.
Sat, 9am–12pm, 2/11
$39
ACC Littleton Campus
Keysha Boggess

First Year Beekeeping and Beeyond
This class will help beginning beekeepers succeed during your first bee season and beeyond! Learn how to install your bees, perform hive inspections, understand what your bees need, and how to help them thrive. We will dive deep into what to expect your first year and you’ll be ready to confidently begin your beekeeping journey.
Sat, 9am–3pm, 3/4
$79
ACC Littleton Campus
Keysha Boggess

AARP Smart Driver
This classroom course helps drivers, 50 years and older, refine existing skills and develop safe, defensive driving techniques. Pre-registration is required. You may be eligible for an automotive insurance discount by successfully completing this class. This class is $20 for AARP members and $25 for non-members.
Sat, 9am–1pm, 2/3

RAPID IT TRAINING AND EMPLOYMENT INITIATIVE
AN H-18 GRANT FROM THE DEPARTMENT OF LABOR

The RITEI program, led by Jobs for the Future in partnership with the Colorado Community College System, connects unemployed and underemployed workers to jobs in Information Technology (IT) and advance current workers to middle- and high-skill positions. This state program covers tuition costs—so training is free for learners.
RITEI will train eligible individuals for in-demand CompTIA A+ Certification or the Google IT Support Professional Certificate, paired with paid work-based learning opportunities, such as an internship or apprenticeship. The program is free, entirely online, and self-paced with one-on-one support coaching. Plan to spend about 10 hours per week for three to five months to earn your credential, depending on the program you choose.
For more information, visit the CCCS website: cccs.edu/industry/rapid-it-training-and-employment/

Ooey Gooey Science – Potions & Polymers
A little of this, a little of that, some wild reactions is where it’s at! Make a slushy treat to eat and see Soda Slobber. We’ll make water disappear and play with snow that never melts. Then—make some Slime that looks alive! You won’t believe that our mixing fun can teach some science before it’s done. With a pop, or a bang, or even some fizz, you have become a chemistry whiz!
Mon–Fri, 8:30am–12pm
Science Matters

LEGO Minecraft
Travel to the Nether with Snapology—but watch out for those creepers! Come join us as we bring Minecraft® to life using LEGO® bricks. Create your own world, including animals, creepers and your very own LEGO Minecraft character.
Mon–Fri, 12:30–4pm
Snapology

Pokémonia
In Snapology’s Pokémonia program, students will explore the Pokémon world and practice their Pokémon training skills! They will create their own training gyms, unique battles, and even their very own generation of Pokémon. Your student will also explore some real-world science as they examine the habitats, characteristics, and needs of different Pokémon. They will do more than catch ‘em all, they will build and examine them all very closely and have a blast doing so!
Mon–Fri, 8:30am–12pm
Snapology

Kids Cooking Showdown
Do your kids love watching cooking shows on TV? Young chefs will take on cooking challenges inspired by favorite cooking TV shows such as Sugar Rush, Great British Bake Off, Nailed It! and Cutthroat Kitchen! Young chefs will get their creative juices flowing in this fun and delicious cooking adventure!
Mon–Fri, 12:30–4pm
Sticky Fingers Cooking
SUMMER YOUTH CAMPS
Ages 6-10 (continued)

July 8–12

Farm to Table Cooking
How does our food go from ingredient to recipe to table? Explore the bounty of summer-fresh, local, colorful ingredients. Young chefs will learn about fruits and vegetables that come from the soil, vines, trees, pods, and bushes. Join us as we whip up some delicious recipes and cultivate lifelong culinary skills.
Mon–Fri, 8:30–12pm
Sticky Fingers Cooking

Super Structures
Does your builder enjoy designing beautiful buildings or functional spaces for their mini-figures? If so, this program is the perfect space for your young architect to sharpen their design and building skills! All buildings, from the Empire State Building to the house next door, started as an idea in an architect’s head. Students will learn how to take an idea from their head and turn it into a building in the real world. They will be guided through the building process, from creating a floor plan to disaster-proofing the structure, so that they will be able to create the next best thing in LEGO® architecture!
Mon–Fri, 12:30–4pm
Snapology

July 15–19

Roller Coaster Science
The physics and chemistry of the amusement park come alive in this half-day camp. Start by building roller coasters and then design and build other mini rides like a merry-go-round, or Ferris wheel. Help EggMo survive the Tower of Doom. Then enter our Glow Lab and explore all things glowy and creepy, explore alchemy and make a golden penny. You’ll smile from end to end when you join us for this carnival of fun.
Mon–Fri, 8:30–12pm
$289
Science Matters

Mega Machines
In Snapology’s Mega Machine Robotics class, your child will create some of their favorite motorized vehicles. Students will learn about gear ratio, sensors, pulleys, cranks, and programming as they build trucks, space rovers, helicopters, and much more. Your child is sure to have fun as they build, learn, and play.
Mon–Fri, 12:30–4pm
$279
Snapology

“Your staff was tremendous. The counselor was very sweet and ensured our kids’ safety.”
– Summer Youth Camp Parent 2023
SUMMER YOUTH CAMPS
Ages 6-10 (continued)

July 22–26

Stem Superheroes Save the Earth
In this half-day, join the Science Matters Superheroes dedicated to fun and saving the Earth. Design your own superhero sidekick, make art from the Sun and create a yummy treat at the same time.

We’ll create a Germinator that makes measuring plants a snap, and design your own hide-a-rock. Earth is our home and we need superheroes to protect it.

Mon–Fri, 8:30am–12pm
$279
Science Matters

Global Taste Buds
What better way to explore another country and culture than through its food? Young chefs will cook recipes from all around the world and explore food history, culture, songs, geography, and languages associated with each recipe. We’ll travel the globe, but you can keep your passports at home!

Mon–Fri, 12:30–4pm
$279

Sticky Fingers Cooking

July 22–26
Beats and Jams: Digital Music Creators
Begin your rise to the top of the charts with digital music production! Just like today’s top artists, you can design your own beats or remix a mashup of your favorite songs to become a digital composer and sound engineer. In this course, students will learn to produce digital music, record sound, make sound effects, and mix their own tracks. No prior music experience is necessary. Student-created soundtracks will be available on a password-protected website to share with friends and family. Students will work in pairs or teams for most of the program.

Mon–Fri, 8:30am–12pm
$279
Black Rocket

Fizz, Glow & Heat It UP!
Explore your favorite chemical element. Conduct experiments that create heat and then cool them down. Create your own battery. Work with your teammates to conduct labs, collect data, and cool reactions. Make things glow, fizz, and explode. Lab aprons and goggles provided!

Mon–Fri, 12:30–4pm
$289
Science Matters

A.I. Adventures: Intro to Machine Learning
Explore the world of artificial intelligence to design fully interactive games and experiences using cutting-edge technology. This program combines artificial intelligence with coding to create an unforgettable learning adventure. Students will construct machine learning models that use image and text recognition within block-based coding software to build a portfolio of projects. Student-created projects will be available on a password-protected Black Rocket website to share with friends and family. Students will work in pairs or teams for most of the program.

Mon–Fri, 8:30am–12pm
$279
Black Rocket

Jr. Science Academy
Join our Junior Science Academy and train your brain (and have fun). Make hydrogen and see how Hydrogen can Power a Vehicle. Learn about Super Volcanoes and create your own version. Ride on the only vehicle that can drive over the land AND sea. Problem solve REAL WORLD problems with your fellow campers. Create new friendships and have fun with our teamwork challenges. exciting Earth, life, and physical science fun with fellow friends.

Mon–Fri, 12:30–4pm
$289
Snapology

“The classes were amazing.”
– Summer Youth Camp Parent 2023
### Minecraft Animators
Create the next popular animated Minecraft video on YouTube! Practice the same skills professionals at Pixar and Disney Animation Studios use. Discover the process of keyframing and tweening, how to use it to bring your own animated stories to life, and how to publish your content on YouTube. Student projects will be available on a password-protected Black Rocket website to share with friends and family. Returning students can create more advanced projects that build on previous years. Students will work in pairs or teams for most of the program.

### Cyber Spies
With the world’s increased reliance on digital data, cyber security is more important than ever! In this class, you are all that stands between a group of international hackers launching cyber attacks and world peace. Through a series of challenges, students will learn to apply tools used by professional digital forensics teams to crack codes and use encryption. Working in teams, you will collect clues, recover lost data, and explore the tools of the trade to become the next great cyber spy! Students will work in pairs or teams for most of the program.

Virtual Reality: The Future is Now

Embark on an EPIC adventure in virtual reality! In this cutting-edge class, learn the foundations of VR design by creating your own virtual worlds, exploring simulated environments, crafting 3D experiences, and learning basic programming concepts. At the end of the week, take home your first cardboard VR headset to show friends and family the new worlds you created. VR projects can be viewed on a website or mobile device. Students do not need a mobile device to take the class, but will need access to a mobile device at home. VR projects will be available on a password-protected Black Rocket website to share with friends and family. Students will work in pairs or teams for most of the program.

Mon–Fri, 8:30am–12pm
Black Rocket

$279

Creative Kids

Learn creative thinking strategies which are valuable life skills for years to come. Discover five steps of the creative process. Fun activities, games and projects will reinforce what we learn. Art projects include photography, drawing, painting, lettering, creative writing, stamping, stenciling, and foil embossing. You will go home with many projects including a decorated journal with notes.

Mon–Fri, 12:30–4pm
$249
Kathleen Wuchpfennig

YouTube® Content Creators

Find your voice and leave your mark on the world! Whether you are six or sixty, it’s time to start a career as the next YouTube star. Explore the variety of content and personalities that exist on YouTube and how to find your own niche. Learn the Dos and Don’ts of the platform and how to practice good digital citizenship. Develop your on-camera presence, your own channel branding, and professional editing skills. Take home a plan for launching your own channel with the content created in class! Student projects will be available on a password protected Black Rocket website to share with friends and family. Students work in pairs or teams for most of the program. Lab and licensing fee included.

Mon–Fri, 8:30am–12pm
$279
Black Rocket

Minecraft Modders

Customize your own Minecraft world and mod the classic game in this one-of-a-kind class. Learn scripting and logic statements as you create your first mods. Students will create a wide variety of new elements, gameplay mechanics, and world-generating mods to change the way you play Minecraft. Projects will be available on a password-protected Black Rocket website to share with friends and family. Returning students can create more advanced projects that build on previous

APPRENTICESHIPS

Apprenticeship Overview

Earn While You Learn

What is an Apprenticeship?
An apprenticeship is a program that combines customized instruction with structured on-the-job training in skilled trades. The apprentice learns hands-on skills under the supervision of a professional and in the classroom, while earning a salary. By combining your education and paid experience with our employer partners, you can launch your career even faster.

Benefits of an Apprenticeship

• Wrap-around support through student navigation for program enrollment and tuition assistance
• Paid work experience with wage increases
• ACC certificate or degree
• Industry credential after passing the certification exam
• Professional work experience
• Award winning programs!

To learn more, call 303.797.5722 or visit apprenticeships@arapahoe.edu

Healthcare Apprenticeships & Training Programs

Medical Assisting Apprenticeship
A medical assistant is an allied health professional who supports the work of physicians, nurse practitioners, physician assistants, and other health professionals in a clinic setting. They are cross trained to perform administrative and clinical duties as a patient liaison. The scope of work differs among practice specialties. Earning potential for a medical assistant in Colorado is between $17.40–$25.53*.

The Medical Assistant Apprenticeship Program is a six-month program that prepares students to take the Certified Clinical Medical Assistant (CCMA) test through the National Healthcareer Association. Apprentices will be hired by an employer partner as Medical Assistant Apprentices while completing their medical assistant training through Arapahoe Community College. Once you have completed your training you could be hired full-time at a facility as a Medical Assistant. The Medical Assistant Apprenticeship Program is a competency-based program that prepares you to become a Medical Assistant in various healthcare settings.

**Program Cost: Estimated $5,700**
- FAFSA eligible
- Scholarship opportunities

**Qualifications/Requirements**
- High school diploma/GED
- No medical experience required

Neurodiagnostic Technician (EEG) Training Program
An EEG technician specializes in running electroencephalogram (EEG) tests, which are used to monitor brain activity and detect abnormalities. They operate specialized medical devices that scan a patient’s brain to show electrical activity. This can help doctors diagnose a wide range of neurological disorders. The EEG Training Program is a 12-month program that prepares students to take the Registered Electroencephalographic Technologist certification (R. EEG T.) through ABRET. Students will participate in bi-weekly live-remote classes. Semester 1 includes an in-person lab at ACC and semesters 2 and 3 include 500 clinical hours with a partnering hospital. The EEG Training Program is a competency-based program that will prepare you to become an EEG Tech in hospital settings. Earning potential in Colorado is $25–$45*.

**Program Cost: Estimated $9,000**
- Workforce eligible
- Qualifications/Requirements
- High School diploma / GED
- No medical experience required

Medical Laboratory Technician (MLT) Apprenticeship
MLTs are allied health professionals who work to perform tests on patient samples to prevent and diagnose both diseases and illnesses. MLTs generally work under the supervision of a Medical Laboratory Scientist or lab manager in laboratories where they perform tests such as analyzing body fluids, tissue, and other substances. MLTs apply technical knowledge in ways that ensure quality test results for patients and their providers.

The MLT Apprenticeship is a paid 12-month program that guides students through the completion of an accredited program. Apprentices will be hired by our employer partner while completing their MLT training through Arapahoe Community College. Earning potential for an MLT in Colorado is $17.91–$42.55*.

**Program Cost: Estimated $6,500**
- FAFSA eligible
- Scholarship opportunities

**Qualifications/Requirements**
- High school diploma/GED
- Completed general education courses with a “C” or above for the Medical Laboratory Technology, AAS
- No medical experience required

Ophthalmic Assistant Training Program
An Ophthalmic Assistant aids ophthalmologists in caring for patients’ eyes and eyesight. They typically work in ophthalmology clinics assisting with eye exams, performing measurements of the eye, administering treatments and medications when necessary, and other patient care duties. The Ophthalmic Assistant Training Program is currently in development and we are excited to launch the program soon. Register for one of our regular info sessions to learn more about this exciting opportunity.

Automotive Technician Apprenticeship

Automotive Technicians are service professionals who inspect, diagnose, maintain, and repair mechanical issues on vehicles at private, commercial, or dealership service shops. With the modernization of vehicles, electrical knowledge is as necessary as mechanical skills. Technicians communicate with customers to explain car issues and service recommendations in ways to develop a trusting relationship, after all, safety is of utmost importance to everyone. The annual earning potential for Automotive Service Technicians is $46,880–$65,000*, with potential to exceed that with refined skills and experience.

The Automotive Technician Apprenticeship is a 1.5–2 year, earn-while-you learn program, offered in conjunction with ACC’s Automotive Service Technology Program, for those who apply and are accepted into ACC’s apprenticeship program and are hired by an employer partner. Prospective apprentices must first apply and be accepted into ACC’s Automotive Program in the summer prior to the annual cohort fall start. Recruitment and selection of pre-apprentices and apprentices occurs in the fall of the student’s first semester. Apprentices will work 20–30 hours a week at the partner employer while pursuing their ACC Associate’s of Applied Science degree in Automotive Service Technology and prepare for Automotive Service Excellence (ASE) certification tests through the National Institute Automotive Service Excellence. Apprentices may also gain brand/manufacturer service training and certifications through their employer.

**Program Cost: Estimated $20,000**
- FAFSA eligible
- Scholarship opportunities

**Qualifications/Requirements**
- High school diploma or GED
- 17 years old and older
- Valid driver’s license
- Satisfactory Motor Vehicle Records (Must meet requirement upon hire and maintain through employment)
- Successfully meet/pass a background check and drug test

Water Operator Apprenticeship

Water Systems Operators hold an important role in providing an adequate and safe supply of drinking water for the communities they serve. Water and wastewater treatment plant and system operators manage a system of machines to transfer or treat water or wastewater. Operators are responsible for the maintenance and repair of equipment and the collection, testing and treatment of liquids, while following regulatory agencies’ documentation and reporting requirements. ACC’s Water Systems Operator Apprenticeship Program is a competency-based program that prepares students to become Water Systems Operators in water treatment and distribution and wastewater collection and treatment. Apprentices will be hired by a partner employer and will work 20–30 hours a week during college semesters and will earn wage increases for skills gained and certification completions. Upon completion of the apprenticeship program, you may be hired on full time by your employer and start out earning $45,000–$51,000* a year (Colorado earning potential).

In Colorado, water operator professionals must meet the regulatory training requirements as determined by the Colorado Department of Public Health and Environment. Through this apprenticeship, apprentices will gain required hours of experience and prepare for the Colorado Certified Water Professionals Certification exams while working in their apprentice position and receiving support from their mentors and supervisors. The Certification domains are Small Systems (Water Treatment Class “D” Certification and Water Distribution Class “1” Certification), Wastewater Collections Class “1” Certification, and Wastewater Treatment Class “D” Certification. In addition to the industry certifications, apprentices enroll in an Associate’s Degree of Science in Biology or Chemistry at Arapahoe Community College. This is a two-year full time college credit academic program that is transferable to participating Colorado universities.

**Program Cost: Estimated $20,000**
- FAFSA eligible
- Scholarship Opportunities

**Qualifications/Requirements**
- High school diploma or GED
- 18 years old and older
- Valid driver’s license
- Satisfactory Motor Vehicle Records (Must meet requirement upon hire and maintain through employment)
- Successfully meet/pass a background check and drug test
